

GIVE TO MONTGOMERY CDC

Our goal is to raise funds that would allow the CDC/Borough to apply for much larger monetary grants, where any monies can be used towards the required match for DCNR grants.

The CDC hopes to with work an area landscape architectural firm/land developer to create a Master Recreation Plan for the largest, by acre, 15-acre Municipal-owned Community Park in Lycoming County. The Plan would include doing an inventory of present conditions, existing and aged equipment and facilities and doing a community survey, getting the community to participate in the processes and re-designing existing facilities. The community park lacks ADA compliant public restrooms and the present restroom facilities are aged.

The CDC envisions the Community Park to be able to be used by all ages, young & old and by all different abilities, including a foot trail accessible by wheelchair and bicycle, taking visitors to slightly above the river's edge, overlooking the beauty of the Susquehanna, possibly adding a stage or pavilion where artists & musicians can perform at monthly CDC hosted community events.

Raid the Piggy Bank for the Park - \$5.00
